

RAMANJEET SINGH

Backend Software Engineer | Java · Scala · Distributed Systems · REST APIs

Hyderabad, India | ramanjeet.me@gmail.com | [linkedin.com/in/raman0001](https://www.linkedin.com/in/raman0001) | [ramanjeetme-a11y.github.io](https://github.com/ramanjeetme-a11y)

PROFESSIONAL SUMMARY

Backend Engineer with production experience building distributed microservices in Java and Scala for insurance and payment platforms. Skilled in designing scalable REST APIs, integrating third-party payment and insurer systems, and resolving high-impact production incidents through systematic problem solving. Strong foundation in data structures, algorithms, and object-oriented design, with a track record of shipping reliable backend systems that support thousands of daily transactions.

TECHNICAL SKILLS

Languages: Java, Scala, JavaScript

Frameworks: Spring Boot, Akka, Akka HTTP, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, Cassandra, Elasticsearch

Architecture: Microservices, Distributed Systems, Event-Driven Design, Multithreading & Concurrency

Tools: Git, IntelliJ IDEA, VS Code, Cursor, Kiro, Antigravity

Core CS Concepts: Data Structures, Algorithms, Object-Oriented Programming, Problem Solving, System Design Fundamentals

WORK EXPERIENCE

Software Engineer - Backend — Upsure AI

Mar 2025 - Present

- Designed and maintained backend microservices in Scala and Akka powering digital insurance workflows — policy issuance, renewals, payments, and document processing — supporting thousands of daily transactions.
- Integrated 5+ insurer and payment gateway APIs to automate quote generation and policy purchase workflows using Scala and Akka HTTP, cutting manual processing time by approximately 40%.
- Led root-cause analysis on critical production incidents across distributed microservices, applying systematic debugging and monitoring to reduce mean-time-to-resolution (MTTR).
- Built and optimized high-throughput REST APIs using Scala, Akka HTTP, Spring Boot, and Elasticsearch to support insurance operations at scale.
- Partnered with Product, QA, and Business stakeholders to translate requirements into backend features, improving the policy purchase and renewal experience.

Software Engineer - Backend — Dice

May 2024 - Oct 2024

- Built RESTful backend services in Java and Spring Boot for expense and travel management modules, improving processing efficiency for enterprise clients.
- Engineered HRMS integrations and transaction workflow automations in Java, reducing manual reconciliation effort and improving data accuracy.
- Designed and optimized MySQL schemas to support high-frequency transactional workloads and reporting requirements.
- Resolved production issues in collaboration with QA and cross-functional teams, maintaining high availability of business-critical modules.

EDUCATION

Full Stack Development — Masai School

Oct 2022 - Oct 2023

Diploma in Information Technology — Government Polytechnic, Ghaziabad

Oct 2016 - Oct 2019

Intermediate — Mathematics, Janta Inter College

2015 - 2016

CERTIFICATIONS

- Problem Solving — HackerRank (Basic)
- SQL — HackerRank (Intermediate)
- JavaScript — HackerRank (Basic)
